SUMMARY

Full Stack Developer with 3 years of experience specializing in React Native and React.js development. Delivered scalable web and mobile applications for startup and enterprise environments, improving performance metrics by up to 30%. Proven leadership in agile teams with strong expertise in modern JavaScript frameworks, RESTful APIs, and full-stack architecture. Committed to writing clean, maintainable code and delivering exceptional user experiences.

- WORK EXPERIENCE
- Front-End Developer – Orderaa (Startup) | September 2025 – Present

 - Contributed as a Front-End Developer in a dynamic startup environment, collaborating closely with a team of senior engineers to deliver an ERP system MVP
 - Developed 15+ responsive UI components, improving page load time by 30% using Next.js, JavaScript, HTML, and CSS
 - Worked directly with UI/UX designers to translate Figma prototypes into pixel-perfect, functional components.
 - Actively participated in agile development, managing tasks, timelines, and sprint deadlines efficiently.
 - Utilized Git and GitHub for version control, code reviews, and team collaboration.
 - Focused on maintainability, performance, and scalability while contributing to core product features.
 - Translated 20+ Figma designs into production components
 - Participated in 8+ sprint cycles

Team Lead – MERN Stack Internship (Depi) | May 2024 – August 2024

 - Led a team of four developers in building a full-stack web application using the MERN stack.
 - Directed team workflow, task allocation, and code reviews to maintain clean, optimized code.
 - Managed debugging, performance tuning, and feature delivery within project timelines.
 - Delivered project 2 weeks ahead of schedule
 - Conducted 30+ code reviews

Full Stack Instructor – CFA Academy June 2025

 - Delivered training on HTML, CSS, JavaScript, React.js, and Node.js. Guided students in building and deploying complete projects.
 - Achieved 90% student project completion rate

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, HTML5, CSS3

Frontend: React.js, React Native, Next.js, Redux, Tailwind CSS, Bootstrap, Expo, NativeWind, React Query, Zustand

Backend: Node.js, NestJS, Express.js, PostgreSQL, SQLite, Prisma, RESTful APIs

Tools & Methods: Git, GitHub, Agile, Scrum, OOP, Docker

Authentication: JWT, Passport.js, bcrypt, argon2, SecureStore

PROJECTS

Movie App – React Native with Authentication | [GitHub Repo](#)

- A cross-platform mobile application for discovering, saving, and organizing movies with a modern dark-themed UI. Features: Movie browsing, search/filter, favorites,
- custom collections, detailed movie info. Auth System: Secure registration/login, password reset, protected routes, session persistence. Secure Data: Refactored authentication flow to use SecureStore for sensitive data storage. Tech Stack: React Native, Expo, TypeScript, Expo Router, Zustand, React Query, NativeWind. Highlights:
- Scalable folder structure, smooth animations, accessibility support.

Task Management App – MERN Stack (Depi Internship) | [GitHub Repo](#)

- A collaborative web application for managing projects, tasks, and todos. Frontend:
- React.js, Zustand, React Query, Tailwind CSS. Backend: Node.js, Express.js, PostgreSQL,
- JWT authentication with HTTP-only cookies. Role: Team Lead – coordinated development, implemented frontend architecture, ensured secure API integration.
- Highlights: Real-time task updates, role-based access control, scalable code organization.

Orderaa ERP System – Front-End (Startup) | [Private Repo](#)

- A modular ERP system MVP built for a startup to manage operations, users, and analytics. **Frontend:** Next.js, Zustand, Radix UI, Zod, TypeScript, responsive dashboard design.
- **Collaboration:** Worked with senior developers and UI/UX designers to convert Figma designs into production-ready interfaces. **Practices:** Followed Git branching strategies, code reviews, and best practices for scalable front-end architecture. **Highlights:** Responsive ERP dashboard, clean code structure, schema validation, and seamless team collaboration with GitHub.
